

## AMENDMENTS TO THE CLAIMS

1. (Currently amended) An aqueous glyphosate concentrate ~~A low-foaming herbicidal composition~~ comprising glyphosate and a poly(alkylene oxide) ~~polyethyleneoxide~~ alkanol having the formula

wherein R<sub>1</sub> and R<sub>2</sub> are methyl or ethyl, R<sub>3</sub> is a straight chain alkylene group containing from 5 to 12 carbon atoms, R<sub>4</sub> is an alkylene group containing 2 or 3 carbon atoms and n is from 4 to 20, wherein the concentration of the glyphosate is from 240 to 550 g/l based on glyphosate acid.

2. (Canceled)
3. (Previously presented) A composition according to claim 1 wherein the group  $(OR_4)_n$  is a poly (ethylene oxide) group, poly (propylene oxide) group or a mixed poly (ethylene oxide/propylene oxide) group.
4. (Previously presented) A composition according to claim 1 wherein n is from 6 to 14.
5. (Original) A composition according to claim 4 wherein n is from 6 to 10.
6. (Previously presented) A composition according to claim 1 wherein  $R_1$  and  $R_2$  are both methyl.
7. (Previously presented) A composition according to claim 1 wherein  $R_3$  contains from 7 to 11 carbon atoms.

8. (Previously presented) A composition according to claim 1 wherein the poly(alkylene oxide) alkanol of formula (I) is ethoxylated, propoxylated or mixed alkoxyated/propoxylated iso-tridecyl alcohol wherein the degree of alkoxylation is from 6 to 14.
9. (Original) A composition according to claim 8 wherein the poly(alkylene oxide) alkanol of formula (1) is isotridecyl alcohol having a degree of alkoxylation of 8.
10. (Previously presented) A composition according to claim 1 wherein the concentration of the compound of formula (I) is from 1 to 50 g/l.
11. (Original) A composition according to claim 10 wherein the concentration of the compound of formula (I) is from 1 to 20 g/l.
12. (Previously presented) A composition according to claim 1 which contains an additional bioperformance enhancing adjuvant.
13. (Original) A composition according to claim 12 wherein the additional bioperformance enhancing adjuvant is an alkylglycoside.
14. (Previously presented) A composition according to claim 12 wherein the additional bioperformance enhancing adjuvant is present at a concentration of from 80 g/l to 250 g/l.
15. (Previously presented) A composition according to claim 13 which additionally contains an alkoxyated alkylamine.
16. (Previously presented) A composition according to claim 1 which comprises an additional anti-foam to reduce foaming of the diluted product.
17. (Previously presented) A composition according to claim 1 wherein the glyphosate is a potassium salt.
18. (Previously presented) A composition according to claim 17 wherein the concentration of the glyphosate is from 400 to 500 g/l based on glyphosate acid.

19. (Previously presented) A composition according to claim 1 wherein the glyphosate is an ammonium salt.

20. (Original) A composition according to claim 19 wherein the concentration of the glyphosate is from 340 to 380 g/l based on glyphosate acid.

21. (Previously presented) A composition according to claim 19 which additionally contains ammonium sulphate at a concentration of from 80 to 140 g/l.

22. (Original) A method of reducing the foaming of a glyphosate concentrate composition having a concentration of from 240 to 550 g/l based on glyphosate acid which comprises incorporating in the composition a poly(alkylene oxide) alkanol of formula (I) of claim 1.

23. (Previously presented) A process of severely damaging or killing unwanted plants which comprises diluting a glyphosate concentrate composition according to claim 1 and thereafter applying to the plants a herbicidally effective amount of said diluted composition.
